Check

Note: We can help you determine if a smart contract may be a scam, but there is no 100% guarantee and we are trying to do our best to detect all scams. The contract check is only used as a reference for users, not as a basis for contract judgment.

## Basic Info

Token Symbol	TRDG
Token Name	Tardigrades.Finance
Token Contract Address	0x92a4...0168b5
Contract Creator	0x1e15...4dfd5a

Contract Owner

0x0000...000000

## Contract Security

### Contract source code verified

This token contract is open source. You can check the contract code for details. Unsourced token contracts are likely to have malicious functions to defraud their users of their assets.

### No proxy

There is no proxy in the contract. The proxy contract means contract owner can modify the function of the token and possibly effect the price.

### No mint function

Mint function is transparent or non-existent. Hidden mint functions may increase the amount of tokens in circulation and effect the price of the token.

### No function found that retrieves ownership

If this function exists, it is possible for the project owner to regain ownership even after relinquishing it

### Owner can't change balance

The contract owner is not found to have the authority to modify the balance of tokens at other addresses.

### No hidden owner

No hidden owner address was found for the token. For contract with a hidden owner, developer can still manipulate the contract even if the ownership has been abandoned.

### This token can not self destruct

No self-destruct function found. If this function exists and is triggered, the contract will be destroyed, all functions will be unavailable, and all related assets will be erased.

### No external call risk found

External calls would cause this token contract to be highly dependent on other contracts, which may be a potential risk.

## Honeypot Risk

Buy Tax: 5.00%    Sell Tax: 4.72%

Above 10% may be considered a high tax rate. More than 50% tax rate means may not be tradable.

### **This does not appear to be a honeypot.**

We are not aware of any malicious code.

### **No codes found to suspend trading.**

If a suspendable code is included, the token maybe neither be bought nor sold (honeypot risk).

### **Holders can sell all of the token**

Holders can sell all of the token. Some token contracts will have a maximum sell ratio.

### **The token can be bought**

Generally, these unbuyable tokens would be found in Reward Tokens. Such Tokens are issued as rewards for some on-chain applications and cannot be bought directly by users.

### **No trading cooldown function**

The token contract has no trading cooldown function. If there is a trading cooldown function, the user will not be able to sell the token within a certain time or block after buying.

### **No anti\_whale(Unlimited number of transactions)**

There is no limit to the number of token transactions. The number of scam token transactions may be limited (honeypot risk).

### **Anti whale can not be modified**

The maximum trading amount or maximum position can not be modified.

### **Tax cannot be modified**

The contract owner may not contain the authority to modify the transaction tax. If the transaction tax is increased to more than 49%, the tokens will not be able to be traded (honeypot risk).

## No blacklist

The blacklist function is not included. If there is a blacklist, some addresses may not be able to trade normally (honeypot risk).

## No whitelist

The whitelist function is not included. If there is a whitelist, some addresses may not be able to trade normally (honeypot risk).

## No tax changes found for personal addresses

No tax changes were found for every assigned address. If it exists, the contract owner may set a very outrageous tax rate for assigned address to block it from trading.
